

# Registering TOOLine

- Start one of the TOOLine Apps
- If you are in evaluation phase, the „License Evaluation“ dialog appears:

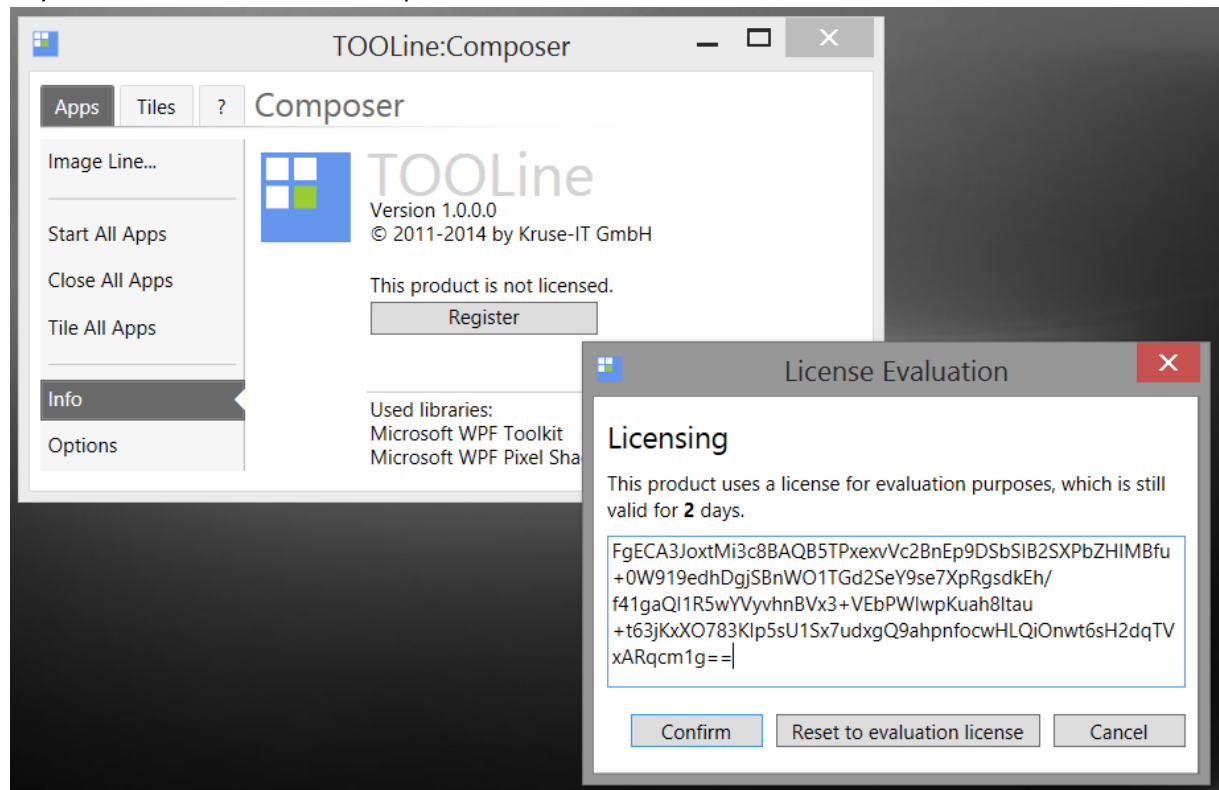

- In case the dialog does not appear automatically, enter the tab „Apps“ → „Info“ and press the button „Register“
- „License Evaluation“ dialog press „Enter purchased license“. The following pop up dialog opens:

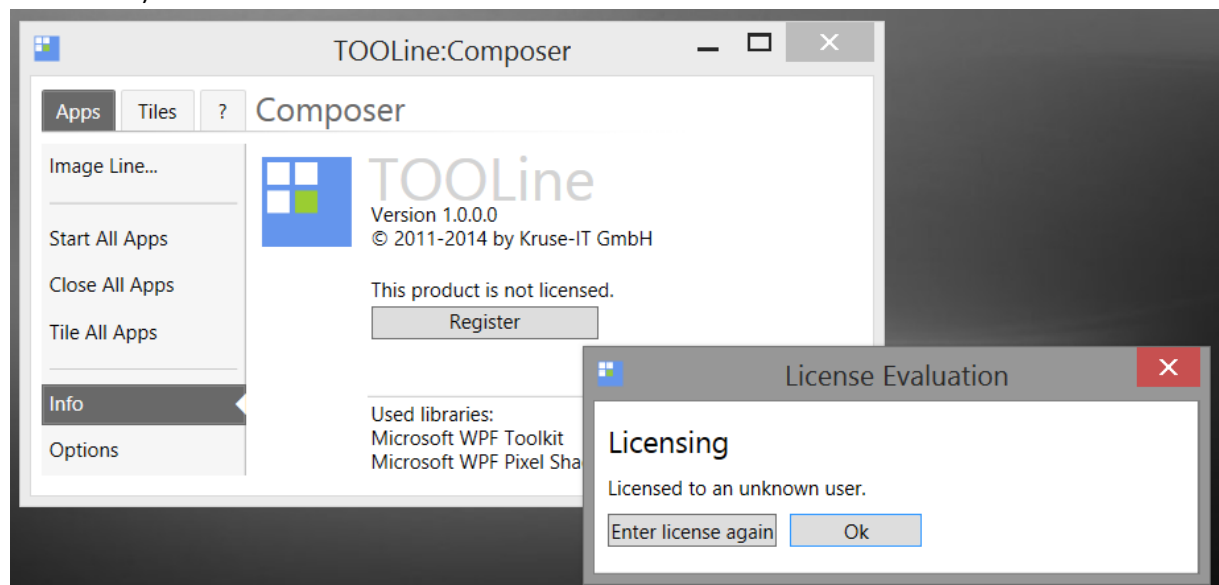

- In case the license key was sent in the purchase mail, select the whole licenses key and copy it to the clipboard with CTRL-C.

In case the license key was sent in a separate file, save the file from the mail to your local file system, open it by double click, select the whole content with CTRL-A and copy it to the clipboard with CTRL-C.

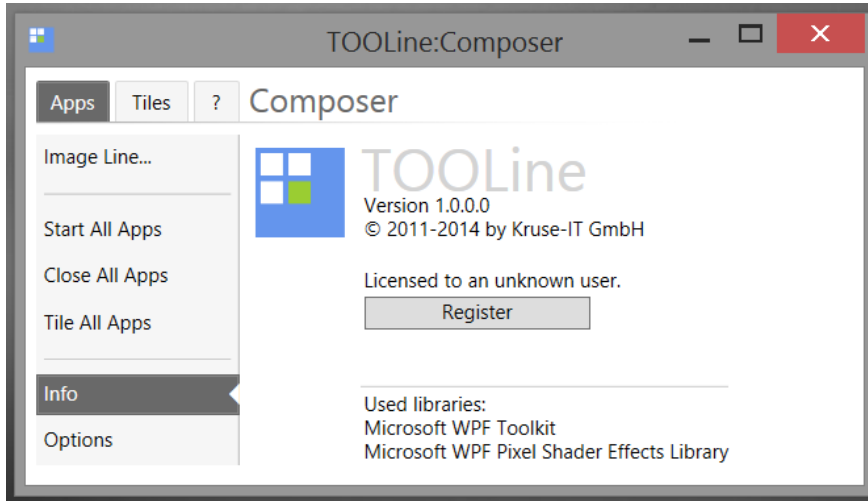

- Switch then back to the „License Evaluation“ dialog and paste the key with CTRL-V. The license key should now be filled in the input field:

- Confirm now the entered license by clicking the „Confirm“ button. The app now checks the license. For this purpose your PC must be connected to the internet at this point. After a successful check, the dialog should look like this (the user name is set to „unknown“ for this screenshot):

- After pressing the „Ok“ button, the Info screen shows the licensing state:

- At this point the license is entered for all TOOLine apps and you can proceed to work.
